

Holland Rescue Mission

Restoration by HRM

Holland, Michigan

Client Challenge

For over 100 years, Holland Rescue Mission has served Michigan lakeshore communities in effort to positively change lives of the homeless and less fortunate through Christ. The Mission's programs have achieved substantial success and continue to grow. In fact, a vacant Menard's building within a large shopping plaza was recently purchased with the intention of renovating the facility to accommodate expanded service offerings.

TowerPinkster Solution

Working collaboratively with Mission, TowerPinkster designed plans to transform the building in a two-phase approach. Phase One, called Restoration by HRM, will include renovations to the former Menard's space and will house a Thrift Store, Café, Auto Sales, Auto Repair and Recycling Center. With an open floor plan design, tall architectural features will help define the retail space from the eatery and Auto zones. New storefront windows will provide a visual connection from outdoors while naturally lighting the space.

Phase Two will address the vacant retail space to the south and will contain Administrative Offices and space for the Mission's Discipleship Program. The synergies between these programs will merge within one complex, providing a truly unique experience for men and women in need to work, learn and grow.

Size: 81,350 SF (Phase One)

Firm Role: **Planning, Architecture, Mechanical and Electrical Engineering, Landscape Architecture and Interior Design Services**
