TowerPinkster Welcomes New Health Care Facility Planner

August 9, 2013 – TowerPinkster, a West Michigan architecture and engineering firm specializing in education, health care, commercial and government building design, announces the addition of Anne Bernardini to its team. This is a new position for the firm and a strategic move to enhance its health care design services.

Anne Bernardini, AIA, NCARB, LEED AP, EDAC will be representing the firm as a Health Care Facility Planner. She is a licensed architect and received a Master of Architecture from the University of Michigan as well as a Master of Arts in Human Environment and Design from Michigan State University. Anne brings more than 25 years in health care architecture and design to West Michigan and she has served multiple long-term clients including St. John Hospital and Medical Center in Detroit, Michigan and The University of Toledo.

Anne also is adjunct professor at Lawrence Technological University in the Architecture and Design Department teaching the graduate seminars she developed on *Evidence Based Design* and *Healthcare Issues and Trends*.

TowerPinkster is an architecture and engineering design firm with offices in Grand Rapids and Kalamazoo, Michigan. This year marks TowerPinkster's 60th anniversary as a creative solutions firm committed to the enhancement of the built and natural environment and to the design of superior, healthy, sustainable environments for clients and communities. Recent work includes projects for Kendall College of Art and Design of Ferris State University, Spectrum Health, Western Michigan University, Kalamazoo Public Schools, Kent County and the Gerald R. Ford International Airport. Visit TowerPinkster online at towerpinkster.com and www.Facebook.com/TowerPinkster
